HOMECOMING 1984

WE'VE GOT THE SPIRIT

As our school year draws to a close, we are once again reminded of the important role Pontiac Central Senior High School plays in the lives of its students and in the life of our community. We see pictured here, in the 1985 QUIVER, those graduating seniors who have been part of our family at Central over these past four years. Each one of you, seniors, will soon be taking on a new role with new responsibilities. How well you, as graduates, function in your own lives and as contributing members of this community can be directly correlated to how well we educated you to think creatively and critically, to make value judgements, and to solve problems.

During your years at Pontiac Central Senior High School we have offered you a multidimensional education by carefully planning your curricular and extra-curricular activities--in the classroom, in clubs and community organizations, and in athletic competitions. We can, however, only plan and implement these curricular and extra-curricular activities; it is you, the student, who shapes them by your enthusiasm to seek excellence. The vitality of this school is replenished each time a student learns a little more about himself and the world in which he lives. That vitality expands each time a student reaches higher and realizes some of his great potential.

The faculty and administration of Pontiac Central Senior High School have tried over these past four years to challenge you, to encourage you, to enliven your enthusiasm, and to sharpen your intellectual curiosity. Now, as seniors who will soon be graduates, it is your new adult responsibility to challenge yourselves and enthusiastically set personal goals of excellence.

Each graduating class, in its uniqueness, has made an impact on this institution. As Principal of Pontiac Central Senior High School, it is my fondest hope that our impact on you will guide you to enthusiastically seek excellence in whatever you do. In that way I know that Pontiac Central Senior High School will always remain a treasured part of your life.

Dr. Russell
Principal

S-P-I-R-I-T

It is customary to describe something unique about you that may appear in this years Quiver for posterity. As I ponder the exact characterization, it strikes me that there are many things that can be written in order that we may remember: Our first assembly; planning Homecoming; the school elections; the Chief and Princess and their court; the Senior trip; the Senior Prom; the Senior Scholarship Committees; and many other highlights too numerous to mention.

It is also important that you possessed qualities of ambition; fairness; inquisitiveness; and most certainly, that of being lively. Therefore, what best describes and highlights your Senior Year? I believe it has to be your planning of Homecoming Week. It was a tremendous effort and resulted in a rousing success. From the theme "Let's Go Crazy" to the concluding football game, you were a "class" group. Those of you who put not only your heart and soul but your time effort into decorations for the school and the unique Semi-Formal Homecoming Dance; the Homecoming Spirit Week Planning Committee and the excellent schedule developed; the beautiful Homecoming Float Annual plaque donated to your school for years to come; showing the leadership in the campaigning for class officers and that of Chief-Princess and their Courts; these highlights will always be remembered.

I guess that this is what I'll always remember about the Class of '85. Yes, You Are Strong with Lots of Drive, I'm Proud To Have Worked With The Class of '85.

Mr. Paterra
12th Grade Principal

It was with great pleasure that I returned to the responsibilities of the Eleventh Grade Class Principal. As I work with the members of the Class of '86, I will continue to provide for them and all the student body the excellent educational program that is the constant goal of our outstanding faculty. As I have done in the past, I shall continue to work to improve and upgrade new and innovative academic programs.

As an educator, I am constantly reminded of the recent media attention given to what is wrong with schools in America. I am heartened by what is right at Pontiac Central High School. Our students respect one another, have a strong desire to learn and are a spirited group of young men and young women who are involved in student activities and loyal to their school.

My personal congratulations to Shonnese Coleman and Keith Arnold for their election to the positions of President and Vice President of the Junior Class. To the many members of the Class of '86 who have already participated in student athletics, student elections, the school Bowl-a-thon, the Homecoming Parade, and related activities, I say, "Congratulations!" And to the members of the Junior Class who successfully made the Principal's All "A" Honor Roll, the "B" Honor Roll, or the Perfect Attendance Lists, I say, "Well done!"

Mr. Osborn
11th Grade Principal

SPIRIT IS THE WORD

The Class of '87 has established an enviable record since arriving in September 1983. Its members are well represented on the three honor rolls prepared by the grade level office.

In five of six marking periods during 1983-84 school year, the attendance trophy or banner was awarded to this illustrious group.

They not only did well academically, but collected more pledges than any class following the Bowl-a-thon. This tradition of excellence will be continued during the 1984-85 school year.

With the outstanding achievements credited to the Class of '87, we can say with pride:

We're the best on Earth and Heaven.
We're the Class of '87!

Mrs. Russell
10th Grade Principal

The philosophy that Pontiac Central Senior High School is "about one thing", "Excellence in Education", was exemplified throughout this 1984-85 yearbook. To the infamous "class of '85", I congratulate you on your leadership, dedication and commitment within the Pontiac Central Family. To all the rest of the student body, I once again offer the challenge to strive for excellence in your academic achievement, attendance, and attitudes.

As we reflect back on this 1984-85 school year, I hope that your memories will be amplified with the knowledge that this year was filled with dignity, respect and pride.

Mr. Lee
9th Grade Principal

Counseling Office

Guidance is a subject that is of value to students, counselors and other members of a school staff who come in contact with learners. It focuses on the learner in such a way as to insure that his educational and personal development will reach its maximum.

This guidance concept is not new and is inherent in all education. Education that is focused on the learner is guidance at its best. Thus will learners be aided to become responsible, self-adjusted and productive individuals.

We at Pontiac Central believe that guidance is for every student in the school, and is concerned with each student's total development as well as each student's individual needs. Active support of administration, staff and community is vital to the success of the guidance program. Guidance is a function of all who educate.

Art Class

Students see daily in the school lobbies, Media Center and Fieldhouse the creative gifts of artwork former students have dedicated to Pontiac Central Senior High School.

The Art Department attempts to develop the talent and abilities of the students who select this elective class. Although the purpose of encouraging all students to explore their creative talents means that each performs to the best of his ability, emphasis is given to the quality of the work produced.

Guest lecturers and field trips to art exhibits are common. Students are encouraged to enter art exhibits and art competitions, and Pontiac Central students continue to win many honors.

Through these means, students have a purposeful background to pursue art as a career or as a meaningful hobby for leisure time activities in the future.

Jean Smith
Art Department

Business Education

The major goal of the Business Education Department for the school year 1984-1985, was to upgrade and replace equipment in the following instructional areas: Typing, Data Processing and Accounting. To date the typing program has been upgraded with the purchase of 34 electronic typewriters, which are located in room 470 and utilized primarily with typing 32. The entire typing program has been revamped starting with the purchase of new textbooks to the upgrading of the speed requirements for all classes.

The Data Processing and Accounting programs purchases are incomplete to date.

Construction has begun in room 431 of a school store. The school store is to be used as part of the 2 hour block Retailing Class. The school store will sell items to the student body at Pontiac Central High School.

RETAILING FOR A LIVING

Co-op Education

Cooperative education in the high school is a program of instruction designed to prepare students for initial entry level jobs in retailing, office and industrial occupations. Students participating in the co-op program should have completed or be enrolled in work-related classes which run concurrent with the on-the-job experience. The student receives instruction on the job, required academic instruction and related vocational instruction in school. Students on the co-op program are released from one or two class hours and receive credit for co-op towards high school graduation. Students benefit from cooperative education programs by receiving a supervised experience to allow for a smooth transition from school to work.

Cooperative Education
Sandy Streit

Foreign Language Department

Foreign languages are now more than a class that one takes for college. In many areas of employment a study in foreign languages has become a necessity especially in the business community.

The Michigan State Board of Education has recommended that every high school student should take at least two years of a foreign language.

The entire world has become a Global community where economic and political survival depends on rapid communication and comprehension of the various languages and cultures of the world. Here at Pontiac Central we are now offering three of the major languages of the western world: German, Spanish and French. The foreign language department has three excellent teachers: Mr. Tony Lingl, German; Mr. Mike Paquette, Spanish; and Mr. William Hoffman, French.

The basic goals of the foreign language department are: Listening, Speaking, Reading and Writing in addition to the teaching of the culture of each language and opportunities for students to travel and live in the countries of the languages taught.

Students have the opportunity to take as many as four years of languages if the student begins study in the ninth grade.

William Hoffman
Foreign Language Department

Mr. Hoffman directing his French class ... they seem to be enjoying it

Mr. Paquette's Spanish class

Only German is spoken here in Mr. Lingl's class... Ya!

Bi-Lingual Department

The Bilingual program has, as its primary objective, the teaching of English as a second language. We feel that if a student learns the English language well, he will be able to succeed in almost any class that is offered to the general student body.

We also offer other Social Studies classes: Bilingual Government, Social Studies Skills and Bilingual Mathematics.

We have the services of a Bilingual Counselor, who helps all students to choose their classes, acts as a liaison person between the school and the homes, and tutors those students that need help in Driver Education classes or Industrial Education classes.

Only 9% of the students in the US answered this question correctly on a recent SAT test. Our 1984 gold medal POP Olympics team answered questions like these with 100% accuracy.

"If improved technology enables researchers to perform more refined experiments, startling evidence may be uncovered that will lead to the _____ of even the most sacrosanct of scientific theories:

- A. tempering B. diagnosing C. utilization D. supposition
- E. formulation

SNAP, MOIS, MEAP, POP, PSAT, SAT - what a number of tests and activities your PCHS English Department prepares you for and encourages you to do your best in, from ninth to twelfth grade. Sixteen highly qualified teachers plan carefully for you to be successful in writing, in speaking, and in reading.

We are proud of the classes we offer, especially our elective program, and our new programs in Career Education and Mastery Learning. For the last five years, PCH students have won 90% of the PTA Creative Writing Awards. Our unique Reading Lab has over 10,000 paperbacks. Together we read over 800 books a month.

Our goals will always be, "We are partners in achieving Excellence in English."

Home Economics Department

Thelma Johnson
Home Economics Department

The Home Economics Department of Pontiac Central High School makes available six different co-ed course offerings, exposing the students to all of the six areas. Exploring Clothing, Advanced Clothing, Exploring Foods, Advanced Foods, Child Development and Family Living.

These courses are being offered to meet the needs of students from a variety of intellectual and environmental levels. The students are being exposed to skills in Home Economics that will be valuable to them at present and in the future.

The Department has facilities that are generally adequate and appropriate for an excellent learning situation.

Upon completion of the courses in Home Economics the students will be able to:

1. Plan, prepare and serve simple meals.
2. Make simple alterations in clothing.
3. Construct simple wearable garments.
4. Become familiar with Child Development and Family Living skills that will be useful to them in the future.

The students will also be able to identify careers in different areas of Home Economics and make useful the skills achieved in the areas for different chosen careers.

Industrial Arts and Education Department

The Industrial Education Department offers courses in Drafting, Graphic Arts, Small Engines, Automotives, Electricity, and Woodworking. All of these courses are offered at the beginning level, then if a student finds a particular course interesting, more courses in that area may be taken. At the completion of these courses, the student should have attained job entry skills.

New technologies are creating a demand for a highly skilled work force. The Industrial Education courses will help you attain these skills.

Mr. Porter - Department Head

The primary goals of education are to provide students with necessary skills to continue learning throughout life, to adapt to changes in society, and to prosper and succeed to their maximum capabilities.

Mathematical competence is vital to the realization of these goals. The two-year mathematical requirement recently enacted by the Board of Education will enable us to provide adequate time to diligently pursue problem solving techniques.

Our current mathematics program recognizes individual differences in mathematical skills and provides a flexible range of options to meet a variety of interests, abilities and goals. The program permits lateral movement which diminishes the "track" barriers, permitting change from one level to another.

The underlying goal of the members of the mathematics department is to provide the foundation of mathematical learning essential to the fulfillment of the student's potential as a productive citizen.

Music Department

Instrumental

Both Mr. Wise and Mr. Seaboldt are responsible for making Pontiac Central's Instrumental Music Department one of the best in the Mid-West. The students along with their instructors have made their mark in the land of music.

Mr. Seaboldt, Music Dept. Head

The Music Department continues to provide educational experience in band and orchestra, and to provide training in piano for those who are interested.

Music students learn a valuable avocation and play in out-of-school organizations for fun and community service.

Some of our students become professional. For them we provide training for a music career. "We don't expect our students to become professional, but we would cheat them if we didn't show them how."

While this education is taking place, the department also provides music for school and community. Last year the performers appeared more than one hundred fifty times.

Steve Szabo
Physical Education
DEPARTMENT HEAD

STEVE SZABO
PHYSICAL EDUCATION PERSONNEL: GRETCHEN GROTHE
SANDY NOWAK
GREG ALESSI
WENDY BECKNER

The primary goal of the Physical Education Department is to teach each student how to reach their optimal physical development through knowledge and participation in a wide variety of individual and team activities. Our physical education staff is very experienced which allows our students the opportunity to choose from a wide range of activities which promote good health, sportmanship and have a carry-over value later in life. Students select all of their classes for the semester spending approximately three weeks in each unit. Some of the activities are weight training, aerobics, floor hockey, tennis, golf, archery, bowling, volleyball, track, wrestling, health soccer, touch football and swimming.

Parent Coordinator

Being a parent coordinator is a rewarding experience for many very important reasons.

What could be better than being among students, faculty and staff who truly care about one another. For the past six years, I have worked and volunteered as parent coordinator at Pontiac Central. And, during those years, I have had the pleasure of working with many parents and community leaders, mailing our newsletters, assisting with Honors and Awards programs, Key Club activities, National Honor Society Receptions, Banquets, Mastery Learning Awards programs among others. No matter the occasion, the students always want to know what they can do to help. That's just the way our students are.

I wish the world could look inside Central and see some of the greatest teachers anywhere. Things have not been very easy the past few years for teachers and students. But, our teachers stayed the course. There have been many occasions when I have asked teachers to volunteer for special activities or donate money for fund raisers. The answer is always yes. However, most of the time when I offer to do simple chores for them, they say that I am much too busy so they do it themselves. That's just the way our teachers are.

Secretaries, Police Counselors, Staff Assistants, Engineers, Custodians, Cafeteria Workers, Counselors, they are all some of the best anywhere. You ask and they give. Often they give even when they are not asked.

The Principals are our leaders, and they lead with care and understanding.

Being a parent coordinator is a very rewarding experience because I am part of the Pontiac Central High School family. A family that cares and shares. That's just the way they are.

Mrs. Groves
Parent Coordinator

The Special Education Department at Pontiac Central has undergone much change in the last three years. Its most obvious change has been in size.

One may contribute this growth to a more observant, informed educational staff. It is with their referrals that we (the Special Educational Department) rely. They bring to our attention, those students, who may be experiencing difficulties.

It is the sincere goal of the Special Education staff at Pontiac Central, that we will provide guidance, which will enable those students who are referred the needed instruction, understanding and patience to overcome any and all deficiencies.

Science Department

Mr. Robert Robb - Department Head
Science Department

During the past several years the Science Curriculum Committee of the Pontiac City Schools has undertaken an extensive revision of the science curriculum at all grade levels. For the high schools this committee consisted of:

1. Teachers from both Central and Northern.
2. Department chairpersons from both schools.
3. The Director of Science Education for Pontiac Schools.

The courses of study for Biology, Chemistry and Physics were updated and rewritten to the extent that was considered necessary so that we could:

1. Provide the necessary experiences for students to be able to adequately learn the material needed to complete their high school study of science.
2. Provide those experiences necessary for students who will be science majors to have continued success with their future science classes.
3. Provide a greater uniformity between the courses offered at the two high schools.

New textbooks were reviewed and choices were made so that by 1985 all courses in General Biology, College Prep Biology, Chemistry, Physics, and Advanced Biology should have new, updated texts.

We have maintained our scope of "traditional" courses in science. This is expected by the colleges and universities. We are fortunate to be able to offer advanced studies as well. It is our hope for the future that the efforts of the science committee at the lower grade levels will spark a renewed interest in science at all levels so we may expand what we have to offer the student body.

: Teachers

New textbooks, new courses and new opportunities awaited students last fall when the doors opened to a new school year. For the first time, freshmen and sophomores were taking courses in world history, practical law, consumer economics, geography and social studies skills, in addition to United States history.

Several students represented Pontiac Central in Washington, D.C. as participants in the Close-up program in March, and they had the opportunity to meet with government leaders. Pontiac Central was represented in April in the Youth in Government program in Lansing, where they participated in a model State Legislature and Supreme Court. Two students were named District finalists in the U.S. Senate Scholarship competition: Russell Anderson and Natasha Reed.

Also, two new staff members joined the Social Studies Department.

Black History Month Observance

Sponsored By The Black Awareness Club

PONTIAC CENTRAL SENIOR HIGH SCHOOL
300 WEST HURON
PONTIAC, MICHIGAN 48053

During the Month of February, in nearly every institution of learning, both public and private, Black History Awareness Programs will take place.

In keeping with the intent of Black History Observances, we are gathered together to honor, recognize and pay tribute to Black Americans for the contributions made in the growth and development of these United States.

We pay special tribute to CARTER G. WOODSON, the Black Historian who founded the Society of Afro-American Life and History for the purpose of preserving the history and culture of Black Americans.

The Pontiac Central Senior High School family and community have joined in this celebration which focuses attention on the life and culture of Black Americans. This years Black History Month Observance was designed and developed to include representatives from the total population of Pontiac Central High School. This practical and realistic approach to "total" student involvement allows the intent of Black Awareness to continue to unfold.

We acknowledge the rich heritage we possess and commit ourselves to contribute to the continuation of that heritage by keeping the Dream Alive.

Dr. Donald Robinson
